## RESEARCH INTERESTS

With over a decade of academic and industry experience, my research focuses on advancing project management and construction practices, with particular emphasis on **strategic planning, sustainability, and organizational development**. I am interested in optimizing **Project Management Offices (PMOs)** to improve efficiency and performance in large-scale construction and infrastructure projects. My work also involves developing **strategic project planning models** tailored to complex sectors such as **oil and gas**. In addition, my research explores the **human dimension of project management**, including **employee well-being, diversity management, and leadership, which are dynamically** critical for building effective, inclusive project teams. I am also engaged in integrating emerging technologies such as **blockchain** and **smart contracts** to advance **contract management**, increase transparency, and streamline project execution in the construction industry. More recently, I have focused on the application of **artificial intelligence (AI)** in **human resources management** within project-based environments. Alongside my academic and research pursuits, I co-founded the Morvarid Hair & Skin Clinic with my husband. This successful
